

## **Italgas confirmed in Dow Jones Sustainability Index for the 2nd consecutive year**

*Milan, 16 November 2020* - Italgas has confirmed its position as one of the world's top sustainability leaders thanks to the inclusion, for the second consecutive year, in the Dow Jones Sustainability Index World, the index managed by S&P Global which includes companies that have excelled globally on sustainability issues.

This result is even more important in consideration of the growing number of companies that aspire to be admitted or confirmed in the index and the increasingly stringent analysis criteria adopted to identify the best performers in terms of sustainability.

Especially, Italgas has been recognised for the progress achieved in Supply Chain Management and Environmental Reporting. This recognition rewards the company's ability to develop increasingly accurate and transparent reporting, also thanks to the use of innovative technologies and methodologies.

The inclusion confirms Italgas' ever-increasing focus on sustainability as an integral part of daily action and growth strategy, as well as a further source of value creation for all stakeholders.
