

ITALGAS PROFILE

Italgas is the first operator in Italy in the distribution of gas and the third in Europe: it manages a distribution network that extends for a total of over 73,000 kilometers through which, over the last year, it has distributed approximately 9 billion cubic meters of gas to 7.8 million users.

The Group holds 1,888 concessions, with a historical presence in the country's major cities including Turin, Venice, Florence, Rome and Naples. Its foundation dates back to 1837. With over 180 years of history behind it, it is unanimously recognized as the company that brought gas into the homes of Italians, contributing to the economic and social development of the country.

Today Italgas is above all a company that looks to the future, with clear growth and development objectives and an important investment plan for the progressive extension of the service and the digitization of networks and plants, a true enabling element of the energy transition to achieve EU 2050 "net carbon zero" objectives.
