

**Italgas improves the rating assigned by Moody's ESG Solution**

*Milan, 4 July 2022* – **Italgas** informs that the annual revision of the ESG rating **Moody's ESG Solutions** (formerly known as Vigeo Eris rating), recognized the commitment of the Company with an **"Advanced"** rating, resulting from an overall improvement of 10 points compared to the result assigned last September. Progress mainly determined by the actions carried out and the further commitments undertaken by the Group in the environmental, social and governance fields.

The rating improvement is a further recognition of the Company's strong focus on sustainability targets that the 2022-2028 Strategic Plan, recently presented to the market, has revised upwards (-34% in Scope 1 and 2 gas emissions, -30% in Scope 3 emissions, -27% in energy consumption by 2028, baseline 2020).

This recognition follows the confirmation of Italgas as a "constituent" of the MIB ESG Index, the blue-chip index for Environmental, Social and Governance (ESG) best practices of Borsa Italiana, part of the Euronext group.
