

Italgas confirmed in the CDP's "Climate A list"

Milan, 10 December 2025 – Italgas has been confirmed for the fourth consecutive year in the prestigious "A List" for Climate Change compiled by the non-profit organization CDP (formerly Carbon Disclosure Project), which includes global leading companies for transparency of information and performance in the fight against climate change.

Italgas also participated in the "Water" section of the questionnaire, obtaining a "B" rating.

In 2025, CDP assessed more than 20,000 companies worldwide, investigating issues related to climate change, forests, and water security.

The result achieved demonstrates the validity of the initiatives set out in the Strategic Plan, confirming the company's concrete commitment in the fight to climate change and in safeguarding water resources. CDP's evaluation considers the completeness of information, awareness and management of environmental risks, the presence of ambitious targets, as well as the demonstration of best practices associated with environmental leadership.
